

# Automotive Forum 2026 – Call for Talks

## SUBMISSION FOR THE AUTOMOTIVE FORUM 2026 IS NOW OPEN

Exemplary topics that can be addressed in the Automotive Forum 2026 in London, UK are:

- Novel waveforms/modulation schemes for radars
- Imaging and cognitive radars
- Radar networks and distributed array radars
- AI signal processing for automotive radars
- Interference topics (mutual, mitigation, ...)
- Emerging topics of joint radar and communications
- Automotive radars above 100 GHz
- Enabling technologies, antennas, and building blocks for automotive radars
- ADAS versus AV – Bridging the radar gap
- New radar simulation, testing, and validation methods

### Time schedule

- 3rd May 2026                      Deadline for submission of abstracts (talk or poster)
- 29th May 2026                    Notification of acceptance
- 12th July 2026                    Deadline for submission of first draft of slides/posters
- 26th July 2026                    Feedback on the slides and posters
- 22nd September 2026           Submission of final presentation slides and posters
- 6th October 2026                Automotive Forum in London, UK (including networking dinner)

Please submit your proposal (title, presenter, abstract or table of contents) by 3rd May 2026 to [benjamin.nuss@tum.de](mailto:benjamin.nuss@tum.de)

*Please notice: The sessions are of **technical nature** and presentations shall show **innovative & technical content** in the automotive radar sector. Your submission may either end up in a session talk (20 min + 5 min Q&A) or in a poster in the poster session depending on innovation quality. Late submissions or “product promotion presentations” are not considered.*
